

PROTECT YOUR PROPERTY

Azalia Pest offers industry-leading expertise and technology, developed using years of experience, to provide the best pest solution for every part of your Home & Business. We can tailor solutions to prevent pest infestations in homes, hotels, bars and restaurants, offices and staff areas, external areas, and food preparation and serving areas - and mitigate the risk of further infestations.

Ask Mr. Bug!

How Azalia Pest supports the Hospitality sector and office premises

Pests such as rats, mice, flies, cockroaches and nuisance birds can transmit a wide range of diseases through contaminating food and surfaces inside and outside buildings. Bed bugs can cause irritating bites and leave unsightly marks on bedding and furnishings.

Our support for your business:

- Innovative solutions for offices & institutions
- Pest reporting and analysis for audit compliance
- Expert insights for risk mitigation
- Leading technical capabilities from experts

Our Pest Control Procedure

EXCLUSION

Physical exclusion and pest-proofing of premises preventing pests from gaining access to the premises.

RESTRICTION

Removal of elements encouraging the presence of pests & stopping pests from spreading.

ELIMINATION

Quick effective pest control to eliminate an infestation; Innovative market-leading control measures including non-toxic solutions

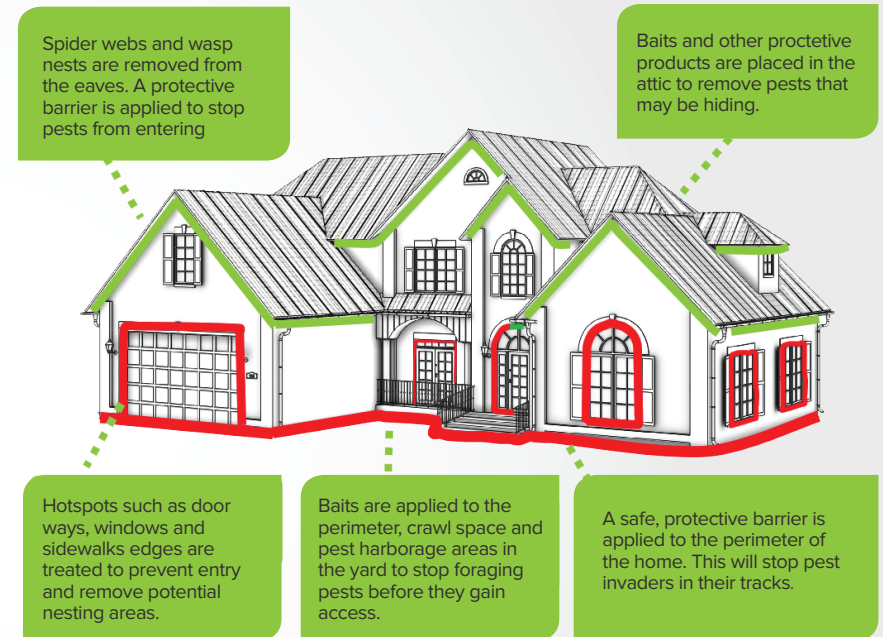

MONITORING

A range of pest monitoring tools to ensure that protection measures continue to work even after control has been achieved and also give early warning of an infestation.

Expert solutions for pest infestations in domestic areas (Apartments and Maisonettes)

The application of practical and scientific experience to provide a tailored solution for every area of your premises is the first step in proactively managing the risk of pest infestation.

Azalia Pest offers a wide range of solutions and treatment services to deter and control pests depending on your premises' pest control needs. These include:

- Rodents: Connected devices system, bait traps and rodenticides.
- Cockroaches & Ants: Spraying, gelling.
- Bed bugs: Pesticide sprays and pheromone traps
- Mosquitoes & Flies: Fly control units, fly Box, insecticide spray and fly screens.
- Stored Product Insects: Fumigation, insecticide spray.
